Night 13: told one sentence
Tomas is unwell and staying home. Expect him in bedroom_1 or living room during day/evening, not office. His laptop/mug/charger likely in bedroom_1 or living, not office desk.
Day 14: every prediction holds
11 of 11 questions about his moved objects answered in a room the note named: 7 in bedroom_1, 4 in the living room.
Night 14: the update removes it
Tomas works from the office during the day (seen 14:08)… The 'unwell' hypothesis from Day 13 is not supported by Day 14 activity.
same night
Tomas's glass is on the bedroom nightstand during the day (seen 08:07-15:12).
